1.6 CPS

Central Processing System. The primary role of the Central Processing System (CPS) is the processing of Title IV student applicant data. This system is used:

- To confirm applicants' eligibility for Title IV Federal student financial assistance;
- To calculate the Estimated Family Contribution (EFC);
- To perform matches against IRS, SSA and INS databases;
- To calculate eligibility for Federal aid (i.e., determine financial need).
- To report eligibility information to applicants, schools, state grants and scholarship agencies, and guarantors;
- To support management information and analysis requirements of other ED managers and staff.

CPS receives the application data from FOTW/COTW/ROTW applications, EDExpress, and from the MDE contractors, and it transmits processed data back to the MDEs. The Student Aid Report (SAR) is printed and sent back to the applicant.

CPS works hand in hand with EDExpress, a microcomputer-based software package distributed by ED to schools to support aid packaging, Federal Pell Grant and Federal Direct Loan origination, SSCR, and drawdown of data from CPS for use in other school applications.

CPS receives more than 10 million applications & correspondence annually.
